# Pope: Condom OK in AIDS fight

## 'A first step toward moralization'

GOVERNMENT officials and religious leaders gathered in the Vatican for a summit on AIDS, Wednesday, Feb. 22.

The Vatican's stance on AIDS is a first step toward moralization, Pope John Paul II said.

**BY JANE GALE AND RAY MANN**

The Vatican's stance on AIDS is a first step toward moralization, Pope John Paul II said. The Pope said that the use of condoms is a necessary step in the fight against AIDS, but that it is not a solution. He said that the only way to prevent AIDS is through abstinence and fidelity.

**VATICAN CITY**—Using condoms may sometimes be justified to stop the spread of AIDS, Pope John Paul II said in a rare break in his strict moralism. But the use of the condom is not a moral solution, he said.

# DOTC reviews all bus franchises

**need a job?**

By Peter D. Jacobowitz

**THE GOVERNMENT** is reviewing all New Mexico bus franchises and may cancel permits that were awarded years ago to companies owned by groups closely linked to state administration.

Business officials say the review is part of a broader effort to clean up the state's transportation system, including the state-owned New Mexico State Police, which is also under review.

"There's a long history of corruption in the state," said a state official. "We're looking at everything."

The review is expected to take several months, officials say. It will focus on the companies that hold permits to operate bus routes in the state, including those that operate routes between Albuquerque and Santa Fe.

# North Korea unveils secret nuclear facility

**By AP**

Pyongyang, Dec. 10 (AP) — North Korea has unveiled a secret nuclear facility, claiming it is the country's first and only nuclear power plant. The facility, located in the northern town of Yongbyon, is said to be a 500-megawatt reactor. North Korean officials said the reactor was built in secret for several years and is now ready for operation. They also claimed that the country has a stockpile of nuclear weapons. The revelation comes as the United States and other nations have been pressuring North Korea to abandon its nuclear program. North Korea has consistently denied any nuclear ambitions.

Condon remarks arouse debate

The image is a very low-resolution, blurry screenshot of a document. It appears to be a page from a book or a report. There is a large, prominent white rectangular area in the center-left, which could be a redaction or a blank space. Faint, illegible text is visible throughout the page, including what might be a title at the top and some body text. The overall quality is poor, making it impossible to read the content.

## Beermen squeak past Kings anew

**By Henry B. Castillo**  
With 15-10 on May 10, the Beermen squeaked past the Kings 101-95 in a closely contested game. The Beermen, led by James Yap, who scored 20 points, defeated the Kings, who were led by Jayson Castro with 18 points. The game was a defensive struggle, with both teams committing several turnovers. The Beermen's defense was particularly effective in the fourth quarter, holding the Kings to just 10 points. The victory gives the Beermen a 2-1 record in the series, while the Kings remain at 1-2.

The following table shows the results of the regression analysis for the dependent variable  $\ln Y$  (ln of the dependent variable) against the independent variables  $\ln X_1$  (ln of the independent variable),  $\ln X_2$  (ln of the independent variable), and  $\ln X_3$  (ln of the independent variable). The results are presented for the years 1990, 1995, 2000, and 2005. The table also includes the adjusted R-squared value and the F-statistic for each year.

# Pakistan PM may free condemned Christian

ISLAMABAD, Pakistan — Prime Minister Yusuf Raza Gilani has ordered the release of a Christian man who had been sentenced to death for blasphemy. The man, who was arrested in 2002, was charged with blasphemy against the Prophet Muhammad. Gilani's decision comes after a series of protests and international pressure. The man, who is now 40 years old, was arrested in 2002 and charged with blasphemy. He was sentenced to death in 2002. Gilani's decision to release him is a significant move, as blasphemy is a serious offense in Pakistan, often leading to the death penalty.

# Itochu pursues ethanol project

Japanese firm secures funds

**By Kenji Ito** **Special to The Japan Times**  
 TOKYO, March 9 — Itochu Corp. has secured a \$1.5 billion loan from the Japanese government to pursue its ethanol project. The loan is part of a larger \$2.5 billion package that includes a \$1 billion loan from the International Development Bank (IDB) and a \$500 million loan from the World Bank. Itochu is the lead company in a consortium that includes the Japanese government, the IDB, and the World Bank. The project is aimed at producing ethanol from sugarcane in Brazil. Itochu is currently negotiating with the Brazilian government for a 30-year lease of a sugarcane plantation in the state of Mato Grosso. The project is expected to start in 2007 and will produce 1.5 million liters of ethanol per year. Itochu is planning to export the ethanol to Japan and other Asian countries.

Detailed description of Figure 6: This figure consists of seven vertically stacked histograms, each representing the frequency distribution of the number of non-zero elements in the vector  $x_k$  for  $k = 0, 1, 2, 3, 4, 5, 6$ . The common x-axis is 'Number of non-zero elements' (0-10) and the common y-axis is 'Frequency' (0-10).  
 - **k=0:** Distribution centered around 2-3 non-zero elements.  
 - **k=1:** Distribution shifted slightly right, centered around 3-4.  
 - **k=2:** Distribution shifted further right, centered around 4-5.  
 - **k=3:** Distribution centered around 5-6.  
 - **k=4:** Distribution centered around 6-7.  
 - **k=5:** Distribution centered around 7-8.  
 - **k=6:** Distribution centered around 8-9.

Figure 1: A line graph showing the effect of temperature on the growth of *E. coli*. The x-axis is labeled 'Temperature (°C)' with values 10, 20, 30, 40, 50. The y-axis is labeled 'Growth (OD600)' with values 0, 0.2, 0.4, 0.6, 0.8, 1.0. The curve shows growth starting at 10°C, peaking at 30°C (OD600 ≈ 0.9), and then declining at 40°C and 50°C.

Figure 1 is a line graph showing the percentage of total catch versus the number of hauls for various fish species. The x-axis is labeled "Number of hauls" and ranges from 1 to 10. The y-axis is labeled "Percentage of total catch" and ranges from 0 to 100. The legend indicates that the numbers 1.0 through 10.0 represent percentages from 100% to 1000%. The graph shows that for most species, the percentage of total catch decreases as the number of hauls increases, with some species showing a sharp drop after the first haul.
